

Testimonials Quiberon 2022

"For the most part, the stay in France was marked by an internship at the Quiberon Town Hall. There I worked in the tourist information, spent days in kindergarten, prepared interviews and concerts and especially learned a lot about the Quiberon peninsula. Besides my internship, I was in a family with two daughters. So I often spent evenings with them and their friends. I also explored the island with another exchange student from my school and spent an afternoon with stand up paddling." Thanks to my stay I have come into deep contact with the French language. My language level has improved a lot since French has been the only way to communicate. Through my internship I got to know the language on a professional level. Since technical language is often not taught explicitly in school, this was partly new for me. Due to the constant contact, however, you get used to it quite quickly. I came into contact with the colloquial language in the evening with my host family. In the beginning it was hard for me to understand everything because of the speed at which they spoke, but that also got better day by day. I was very pleasantly surprised how quickly I got used to the language and could participate in it. It was a great opportunity for me to get to know the everyday life of a Frenchman. Not only in his spare time but also professionally. Here I quickly noticed that there is not so much bureaucracy required there and a fairly friendly relationship prevails at work. In general, I am very grateful to have got to know the language and culture as well as their everyday life so intensively.
